

QUARRY MATERIALS TESTING

CTS have the resources to offer competitively-priced testing and consultancy services to aggregate producers.

For extra convenience, CTS provide an aggregate sampling and/or collection service.

AGGREGATE TESTING INCLUDES:

- Polished Stone Value
- Aggregate Abrasion Value
- Particle Size Distribution (Sieving)
- Bulk Density
- Flakiness Index
- Elongation
- Particle Density & Water Absorption
- Los Angeles Coefficient (Resistance to Fragmentation)
- Drying Shrinkage
- Magnesium Sulphate Soundness
- Sodium Sulphate Soundness
- Micro Deval
- Railway Ballast Suitability
- Filter Media Stone Suitability
- Chemical Testing

CTS acknowledge the importance of providing a prompt 'turn around' service for tests on quarried stone, sand and gravel.
